Dear Sir,

Greetings for the day!!

Thanks a lot for showing interest for the YEP Engineering Program.

I have attached the **YEP Brochure, Partner Eligibility Criteria**, **College Template, Student Data Template** along with a brief write up about the program.

About the program:

The Youth Employment Program (YEP) stems from the Tata Affirmative Action Program (TAAP) under the CSR umbrella and has been driven since 2010 addressing the challenge of unemployment within India. We believe that given the right opportunities and learning skills, even those from socially and economically marginalised communities, will be able to showcase their potential, join the mainstream economy, and shall have a dignified life. The program aims at providing Free Employability Training for the socially and economically marginalized undergraduate youth during their graduation course. Thus, TCS is promoting and providing access to quality education, technical skills, and enhanced competencies for students of such communities.

We believe that this program will create a noticeable transition in the lives of undergraduate engineering and science students to help them step confidently into the corporate world. **The ultimate goal of this program is to enhance the employability skills for sustainable inclusive growth.**

The program comprises of **4 Competencies**: Business Communication Skills, Numerical Ability/ Quantitative Aptitude, Logical Reasoning and Programming Concepts. The training intervention starts off during the V semester and continues in a phased manner till the VII semester via Phygital Model.

Dear Sir,

Greetings for the day!!

Thanks a lot for showing interest for the YEP Engineering Program.

I have attached the **YEP Brochure, Partner Eligibility Criteria**, **College Template, Student Data Template** along with a brief write up about the program.

About the program:

The Youth Employment Program (YEP) stems from the Tata Affirmative Action Program (TAAP) under the CSR umbrella and has been driven since 2010 addressing the challenge of unemployment within India. We believe that given the right opportunities and learning skills, even those from socially and economically marginalised communities, will be able to showcase their potential, join the mainstream economy, and shall have a dignified life. The program aims at providing Free Employability Training for the socially and economically marginalized undergraduate youth during their graduation course. Thus, TCS is promoting and providing access to quality education, technical skills, and enhanced competencies for students of such communities.

We believe that this program will create a noticeable transition in the lives of undergraduate engineering and science students to help them step confidently into the corporate world. **The ultimate goal of this program is to enhance the employability skills for sustainable inclusive growth.**

The program comprises of **4 Competencies**: Business Communication Skills, Numerical Ability/ Quantitative Aptitude, Logical Reasoning and Programming Concepts. The training intervention starts off during the V semester and continues in a phased manner till the VII semester via Phygital Model.
